

MISSING

COMPASSION in the Illinois House of Representatives.

LAST SEEN in Springfield around 1978, when legislators passed an ineffective medical marijuana act that not only failed to protect patients from arrest, but was never even implemented.

Please call your state representative today

using the number below and urge him or her to support SB 2865, a compassionate bill that would allow seriously ill patients to register to use marijuana upon the recommendation of a doctor. Once you are connected to your state representative, ask him or her to encourage the state senator from your district to vote “yes” on SB 2865 in November so that it can be sent to the House for consideration.
